Subject: Microsoft Settlement

I support the Microsoft/DOJ settlement.
I do not agree with the nine holdout states. I believe their
uncompetitive constituents are manipulating their AG...

I remember how difficult it was to access the internet.
I remember how difficult it was to use multiple software applications
because none would work with the others.

Microsoft has made my life as a consumer much, much easier and
productive.
Yes, Microsoft is a monopoly, but they are a monopoly that uses their
position to benefit consumers.

Please tell Sun, AOL, Oracle, etc. to spend their money on becoming
competitive instead of fighting Microsoft.
